
900 Series

Single and Double new construction and replacement widows

Build your home right the first time!

Making your dreams come true with the purchase of a home can be exciting and overwhelming. If this is your first home or third, it has never been easier to choose the right window. The 900 series single and double hung new construction and replacement windows satisfy the demand for beauty and energy performance, all while providing the peace of mind that your new windows have the durability needed. Quality windows start with quality construction. Every 900 series window is specially designed and custom made with the highest quality materials all while maintaining a price that will fit into any budget. All 900 series windows are manufactured per your specifications so there is no need to purchase stock sizes and make them fit.

Windows built with all the comforts of home while designed to save energy.

The 900 series does more than keep out the rain, wind, and cold. It allows you to stay cool in the summer and warm in the winter and keep your energy costs in line. All Windowcrafters windows have fusion welded multi chambered vinyl frame components for maximum strength. Featuring a classic brickmold look exterior profile. Tests performed by the NFRC show vinyl windows have exceptional thermal ratings. The 900 series allows you to choose from 2 levels of energy efficient glass and spacers systems for superior thermal performance. All 900 series feature a 3/4" insulated glass unit filled with Argon gas utilizing the Dura Platform warm edge spacer system. Dura Platform offers two levels of spacer technology and all 900 series windows are built standard with Duraseal ensuring your new windows won't have an ig unit seal failure. Durlalite is available as an upgrade, and is the most advanced spacer technology in the market. Windowcrafters windows feature the Cardinal group of LoE glass products. Cardinal provides the ideal balance of solar control, exceptional SHGC ratings and high visible light transmission. Weather you choose LoE-270 which is the perfect glass for fighting the heat in our regional climate or LoE-366 for ultimate solar heat reduction your windows will be specially designed for year round comfort and exceptional energy efficiency. 900 series windows can even be built to exceed Energy Star v6 Thermal ratings for the South-Central Zone in both U-factor and SHGC when configured with the qualifying insulated glass package. Each one of your windows will be manufactured taking all these little details into consideration, guaranteeing your new windows will deliver long and reliable service.

Window CRAFTERS

All 900 Series windows can be configured as replacement units

Vinyl windows are bulit to perform

1. PVC vinyl fusion - welded frame and sashes that never chip, peel, crack, warp, or need to be painted. AAMA certified
2. Sloped exterior sill forces water to drain to the exterior
3. Multi-chambered frame with insulating air spaces and maximum strength
4. 3/4" Insulated glass unit featuring Dura Platform Warm Edge Spacer system and Argon gas fill
5. Integral nailing fin and J-channel
6. Duel sash locks with Interlocking sash meeting rails for added security
7. BSI inverted balance system for smooth sash operation
8. Duel weather -stripping on sashes to help keep air and dirt out
9. Integral lift rail for easy operation, duel on double hung
10. Classic brickmold look exterior frame detail
11. Composite tilt latches for maximum strength
12. Tilt in take out sashes for easy cleaning
13. Single hung jam depth 2 7/8"
    Double hung jam depth 3 5/8"

We don't forget the little details.

900 series windows are built to your specifications as shapes, sliders, pictures windows and double hung windows with two sashes that tilt inward for easy cleaning or as single hung windows with a large top fixed glass and a single bottom tilt inward sash. Both the double and single hung styles feature the inverted balance system which allows your windows to simply lift up with little effort like they are floating. The 900 series have flush tilt latches that activate to hold the movable sash in place and are made of composite giving them unparalleled strength and durability. Many little details can be customized on the 900 series windows such as color, grid options, screens, and wood jams at any depth.

Life gets busy, why not make windows low maintenance?

Vinyl is a winning combination of saving money by lowering your utility bill as well as minimizing exterior maintenance costs. Vinyl windows do not require any painting, ever! Vinyl is impervious to rot, swelling, rust, corrosion, blistering, flaking and the infestation of termites or other insects. Vinyl does not attract mold and fungus, and vinyl windows are easy to keep clean. These features inherent to vinyl make all Windowcrafters windows an impressive option for any home.
